Applicants submit that the skilled artisan would immediately recognize the correctly spelled name of this compound in view of the teachings provided in the specification as filed (see, *e.g.*, the structure of resveratrol provided at page 19) and given that the compound is known in the art. Further, support for this amendment can be found in the parent application, U.S. Application No. 09/174,077 filed October 16, 1998, which application is listed in the Cross-Reference to Related Applications section on page 1 of the instant specification and which is incorporated by reference at page 5, lines 19-20. In particular, the correctly spelled name of resveratrol appears in Figure 13A and Figure 14. Accordingly, no new matter is being added by way of this amendment.

Applicants further add by way of this amendment new figures 1-19 which were inadvertently omitted from the specification as filed. Applicants submit that no new matter is being added.

Applicants respectfully submit that all of the claims remaining in the application are now believed allowable. Favorable consideration and a Notice of Allowance are earnestly solicited.

Respectfully submitted,
